**Role:** Machine Learning Engineer  
**Contract:** Permanent  
**Location:** Bank, London  
**Salary:** Dependent on experience

**THE COMPANY**

We are a fast-growing technology company with offices in London and Manhattan, dealing with great clients across the globe.

Our product uses artificial intelligence techniques to capture data from unstructured documents such as pdf's, spreadsheets and emails.

Our parsing technology provides efficiencies and auditability to repetitive tasks which would normally require the time-consuming manual extraction of data.

**THE ROLE**

As a machine-learning engineer, you will have solid experience in building machine learning models. You will need to have the ability to design and deliver solutions to unique problems and be ready to keep up to date in dynamic domain.

You will need to be able to efficiently priorities tasks and manage your time. Good mathematical skills with problem solving and logical thinking are required for this position. Quick learning, enthusiasm for technology and a proven track record in delivering solutions is also desired. You will need to be able to deploy production grade machine learning models and own performance and stability of code.

You will be joining a quickly growing team of Data scientists and be able work well in a team, on top of working efficiently on your own. We are developing state of the art models in computer vision, NLP and other domains, as well as integrating with new innovative frameworks as needed.

**Essential Skills:**
- Python
- Neural Nets
- TensorFlow or similar platforms
- Basic Statistics

**Desirable skills:**
- Amazon Web Services (AWS)
- NLP, Ontologies
- OCR
- PhD
- Elasticsearch
- Knowledge of .NET development using C#
- SOA, Agile, SQL

Candidates should be able to start within four weeks and be eligible to work in the UK without visa sponsorship. This is a fantastic opportunity for someone looking to join a successful and supportive company that is committed to the training and development of its employees.
